

Aron Lomner

Optimistic, enthusiastic and highly motivated Full Stack Web Developer with a strong foundation in a variety of programming languages including Python, Java, JavaScript, Dart, Lua, and GDScript; and in frameworks like Spring Boot, React and Flutter, with hands-on experience and a proven ability to create innovative solutions, demonstrated through projects like a [Personal Profile Website](#), [CSS Box Code Generator](#), and a [Donut Clicker Game](#). Currently honing skills at WeCanCodeIt boot camp. I bring a strong work ethic and determination to every project.

PROJECTS

Personal Profile Website

Designed and developed a captivating Personal Profile Website showcasing my skills and projects, enriched with a visually striking image-to-particle animation. Crafted using HTML, CSS, and JavaScript, the website not only serves as a professional portfolio but also engages visitors with a unique and immersive experience. (Tip: Hover over the logo)

CSS Box Shadow Generator

A tool for frontend developers to easily create beautiful box-shadows using an intuitive GUI developed using HTML, CSS, Javascript, Git, and Github.

Donut Clicker Game

Collaborated with a team of classmates to develop an engaging Donut Clicker Game using HTML, CSS, and JavaScript. Inspired by the concept of incremental games like Cookie Clicker, our project focused on simplicity with an autoclicker feature and the ability to purchase multipliers to enhance donut production.

J.P. Morgan Software Engineering Virtual Experience

Completed J.P. Morgan Software Engineering Virtual Experience on Forage, setting up a local development environment, resolving repository issues, and implementing a live graph using Perspective. Demonstrated strong software engineering skills, went beyond requirements with extra tests, and contributed to open-source projects, showcasing a commitment to continuous learning and collaboration.
