Aron Lomner

Full-Stack Developer

SUMMARY

Innovative software engineer with a knack for detail. Working in both front and back end development, I excel in creating seamless user experiences. Highly motivating and hardworking, I thrive in fast-paced environments and quickly adapt to new technologies.

EXPERIENCE

Student Software Engineer at WeCanCodeIt, Cleveland, OH

October 2023 — Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Built semantically structured full stack web applications
- Applied agile methodologies like SCRUM for project management

Recent Projects:

Toolhub (Fullstack Web App) – Led a team in developing Toolhub, a community-driven tool lending/borrowing app. Utilized React.js and Tailwind CSS for the frontend, with Java and Spring Boot for the backend. Implemented features such as group creation, tool listings with image uploads, group chat, and direct messaging. Managed version control with Git and GitHub. Delivered a user-friendly platform showcasing leadership, technical skills, and collaborative development.

Personal Profile Websites – Designed and developed a captivating Personal Profile Website showcasing my skills and projects, enriched with a visually striking image-to-particle animation. Crafted using HTML,CSS, and JavaScript, the website not only serves as a professional portfolio but also engages visitors with a unique and immersive experience. (Tip: Hover mouse over the logo at the top left corner)

Other Projects: CSS box shadow code generator, Donut clicker game, CLI basic blackjack game.

CERTIFICATIONS

CompTIA Information Technology Fundamentals +

CompTIA - August 2022
